Hamilton County

In honor of the Avondale Branch Library's 100th anniversary, the Library will launch an accessibility project. This construction project will open the branch library's doors to everyone by adding an alternative entrance, elevator, and two new bathrooms that will remove physical barriers to Library service. Additional enhancements will include new carpeting and lighting, an upgraded heating, air conditioning and ventilation system, improved Internet connectivity, reconfigured service desk, and self-check. Estimated completion for the project is early 2014.
